Events

We post all our community events on the blog. We use Google + and Meetup for our events.

Upcoming Events:

Community Events - 2013

Developer Community Meetings

Host a Community Event:

There are Ushahidi users around the world. You can Create your Ushahidi Event. See our wiki page for details. Or, drop us a line:Info@ushahidi.com to get started.

Types of Events:

- Topical User Groups: we have regular Environmental Mapper Google Hangouts. Soon there will be more hangouts about Elections and Corruption mappers.
- Getting involved: We've held Research and Software Developer meetups. These are also becoming quite regular. In the future, we'll host meetups for translators and more.
- Hackathons: we partner with groups (RHOK etc.) and sometimes host our own hack days
- Upgrade Days: Sometimes you need a little developer help when upgrading to the latest version of software. We host upgrade days to help each other.
- Casual in person meetups: Ushahidian staff hold meetups in various locations.
