Set-up a wiki account

Wiki Tour and Tutorials:

The wiki includes three major types of content: Types of Maps, Community Engagement (e.g. Best Practices) and Product and Technical Documentation. The wiki is also a community interaction zone:

- You can collaborate and share knowledge in one space.
- Your contribution is tied to your user account.
- You can connect with others who share your common interests.
- You can blog, comment and more to help build and spread Ushahidi.

Here's a video overview on the wiki:

Note: We are not using all the features (e.g. JIRA) in this wiki. There are more Atlassian tutorial videos to help you learn and share.

Setting up your account:

1. Create account at wiki.ushahidi.com reviewing the these steps.
2. Here is an example of an Ushahidi wiki profile: Heather Leson
3. Search for your area of interest such as Our Products or Community
4. See Getting Involved to learn more.

To edit your email notification settings:

1. Choose your profile picture at top right of the screen, then choose Settings.
2. Click Email in the left-hand panel.
3. Click Edit.

We decided to call the two main teams: Community members and technical members. With Ushahidi, only 10 % is the technology and 90% of Ushahidi is everything else that people contribute. If you have a better term, great. Add a comment to the wiki and we can discuss.
