Email

To have your pull reports via email, you'll need to update the email settings for your deployment.

Steps

1. Go to the email configuration page on http://yourdeployment/admin/settings/email
2. Enter your email username and password (note that this to refer to the site email address set up on http://yourdeployment/admin/settings/site)
3. Enter the email server host, port, type and if it supports SSL - check with your email provider in case you're not sure about these.
4. Click on "Test Settings" to make sure your credentials work
