

Configuring Ushahidi v2.X

You configure Ushahidi v2.X through four tabs (addons, settings, manage and users) on the administration dashboard, <http://www.example.com/admin>, where `example.com` is the URL of your Ushahidi deployment.

If you want to make changes to Ushahidi v2.X that aren't in these tabs, you should also check out the [Ushahidi v2.X developer guide](#).

- Addons (Plugins and Themes)
 - Add and Configure Themes
- Manage
 - Auto-approving reports
 - Categories
 - Map Layers (WMS, KML, Google Earth)
- Settings
 - Basic Site Information
 - Configuring Twitter on a deployment
 - Connecting SMS to Ushahidi
