Themes

Name	Description	Link	Version
Facilities	Theme for mapping the location of facilities.	https://github.com/WhitespaceIO/Ushahidi_Theme_Facilities	2.6
Booty	A theme for Ushahidi 2.X based on the Twitter Bootstrap theme.	https://github.com/rrbaker/booty	1.0
Polaroid	An individual map-focused landing page with a streamlined report detail page. PLEASE NOTE: Polaroid requires you to change additional settings via your admin panel -> http://goo.gl/Mw3o9	Included in core application	1.0
Unicorn	The default Ushahidi theme has the classic two column layout with the map on the left and the categories on the right. With Unicorn, we decided to change things up a bit and give the map the full width of the page. It's clean, simple and gives you a fresh-looking layout for your next deployment!	Included in core application	1.1
Bueno	Porting WooTheme's Bueno Wordpress theme to an Ushahidi Theme. Changing the Color Scheme By default, the color scheme is a dark pink. However, there are several pre-configured color schemes located in the "color-options" folder. To use them, just move or copy the desired css file to the same directory the "_default.css" file is in your site will automatically update to that color.	Included in core application	1.0
Terra	David Kobia's blueberry flavored version of the default Ushahidi theme.	Included in core application	1.0
