

Sensors

Ushahidi v3.X is designed to include sensor feeds. To see how people might use these, the Ushahidi team have been:

- talking to the [Brck](#) team about feeds from Brck to Ushahidi,
- looking at available sensors and sensor types,
- looking at online sensor datastores (and how to access them),
- looking at sensors in the equipment around us (e.g. laptops and mobile phones)
- checking out work on sensor feeds in other communities,
- working on how to present sensor data in Ushahidi v3.x
- [blogging about sensor ideas](#)
