

Example Sensor Datastores

These are all places where communities put their sensor data; they're good places to look for existing projects, and also places to potentially add sensor data to Ushahidi v3.x from.

Site	Data access	Notes
xively.com	Rest API: https://xively.com/dev/docs/api/ API objects: product: device: feed: datastream: datapoint. Can pull data snapshots, and png images of recent data values.	Cost: developer account is free for up to 5 sensor feeds (but only stores data for 30 days) Community: can discover feeds at: https://xively.com/dev/docs/api/data/read/all_feeds/
