

Comparison Crowdmap "classic" vs new Crowdmap

Feature	Crowdmap	Crowdmap "classic"
Mobile	Crowdmap is a "mobile first" site - responsive design. All admin and other features are fully available on the mobile crowdmap.com	We had ios, SMSSync and Android apps. Map administration was not available.
Create a map	This is an "option" when sharing reports and content.	This is the starting point of sharing reports and content.
Create a report/ Create a post	You can share a report. No map is necessary.	Create a map. Add categories. Do outreach. People submit reports.
Share a report/Share a post	Posts can be shared on Facebook, Twitter and more. You can Embed posts.	Two ways to share reports: <ul style="list-style-type: none"> • use "share reports between deployments." • Use upload/download reports feature.
Find content	Search the whole Crowdmap site for posts. You can use Hashtags eg. #cmupdates	Search individual Crowdmaps for reports. There is no aggregation for all reports.
Find Maps	Search for Maps by keywords.	The Crowdmap "classic" site has a basic search for all maps (Ushahidi platform and Crowdmap)
Find People	This feature is coming soon.	Not a feature
Add content	You can aggregate posts from Instagram	Aggregate reports from SMS, Facebook Twitter, Email or Mobile Apps
