

# Hackathon planning

Hackathons need to be fun. Core features, api clean-up and issues/bugs may not be valued or fun hacks for folks. While we would love help on custom forms or dynamic forms, we know that hackathons are special places.

Some of the potential hacks for 2012:

- FrontlineSMS to Ushahidi (See [FrontlineSMS to Ushahidi Hack Day](#)) We'll have more details on this future hack.
- Tweak the Tweet to Ushahidi
- OpenIR to Ushahidi (This will be done at RHOK ICCM)
- Connect MySociety and Ushahidi:
  - [Components and Strategy](#)
  - [Map it http://global.mapit.dev.mysociety.org/point/4326/-1,38.6.html](http://global.mapit.dev.mysociety.org/point/4326/-1,38.6.html)
