

Day of Swift Beta

Day of Swift Beta

SwiftRiver has been in beta for part of the summer. The code is now open and available on github. We're hosting a Day of Swift Beta to connect with you to brain test and talk Swift. This will be an online event hosted on skype and Irc. You can connect with us:

When: Saturday September 8, 2012

Times: 13:00 EAT - 17:00pm EAT, 12:00 pm EST - 16:00pm EST (If we can get some help in the PST timezone, we'll extend the hours to be PST friendly too.)

Who: David, Emmanuel and Heather

The plan: (totally hackable)

It is always better to test software together. We'd like to bounce ideas with you. So, here's to a Day of Swift Beta

1. Get your swift beta account
2. Connect with us either via skype or irc: [Contact Us](#)
3. Logon during the Day of Swift into the Swift Public Skype channel or IRC. We can then collaborate
4. We'll set up an etherpad and google doc to collaborate topics. The team might even designate items to test/break as part of the day.
5. Issues, bugs and features will be tracked in Github

Your ideas:
