

FrontlineSMS to Ushahidi Hack Day

Ushahidi and FrontlineSMS function well together with version 1 of FrontlineSMS. The goal of this event is to develop code to connect Ushahidi and FrontlineSMS Version 2.

Date: Wednesday, September 26, 2012 in Nairobi

The hack day plan:

- Get the Web Connection feature in FrontlineSMS 2.0 to push incoming SMSs to an Ushahidi deployment/Crowdmap
- For contacts in FrontlineSMS that have location information, append this to the SMS before its pushed to Ushahidi
- Using FrontlineSMS for sending out alerts; two-way communication for SMS (incoming and outgoing)

Who should attend:

Software developers

Ushahidi and FrontlineSMS community users to test

Registration

Resources:

All documentation is stored is on this wiki page: [How to Set-up FrontlineSMS and Ushahidi](#)

Code is stored: github link to be added
