Upgrade Day 2.7.1

Ushahidi is hosting our next Upgrade Day 2.7.1 on September 25th - 26th 2013. Our team and community are hosting office hours to support deployers as they upgrade to the latest, most secure version of Ushahidi.

Why should you Upgrade?

This release featured the following fixes:-

- Bulk deletions coupled with single report deletion
- Login page issues Date picker issues in default theme
- Database table prefix installation issues
- Some Custom form issues Image upload issues (uploading jpegs, image sizing issues)

View the full list of fixes tagged under the 2.7.1 milestone on our github issue page.

Read the blog post announcement on v2.7.1's release

If you upgrade your deployment or help the community upgrade, please add this to your social media or blogs.

Join us on Skype or IRC: Contact Us. Here is the upgrade day schedule if you are available to help fellow deployers become upgrade pros 😊.

How do I upgrade?

- Upgrade process
- Migrating to a newer version of Ushahidi
