

Ushahidi 3.x Revisions Resource

FEATURE: COMPLETE

DOCS: UP TO DATE

The Revisions endpoint is an extension of the Posts endpoint. However Revisions are read only so the only allowed method is GET.

- GET `posts/:post_id/revisions`
- GET `posts/:post_id/revisions/:id`

GET `posts/:post_id/revisions`

Listing all posts

METHOD: GET

ENDPOINT: `/api/v2/posts/:post_id/revisions/`

AUTHENTICATED: No

Query Parameters

Name	Type	Description
<code>q</code>	Optional	Only Posts containing this search string will be returned, matched against post title and content
<code>type</code>	Optional	Only posts of this type will be returned: report, revision, comment or alert
<code>locale</code>	Optional	Only posts with matching locale will be returned
<code>slug</code>	Optional	Only posts with a matching slug will be returned
<code>form_id</code>	Optional	Only posts with this form_id will be returned
<code>user_id</code>	Optional	Only posts created by this user_id will be returned
<code>created_before</code>	Optional	Returned posts will have a created date smaller than this date
<code>created_after</code>	Optional	Returned posts will have a created date greater than this date
<code>updated_before</code>	Optional	Returned posts will have an updated date smaller than this date
<code>updated_after</code>	Optional	Returned posts will have an updated date greater than this date
<code>order</code>	Optional	Returned posts will be sorted in this order: ASC or DESC. Default: DESC
<code>order_by</code>	Optional	Returned posts will be sorted by this field. Default: created
<code>limit</code>	Optional	Limit number of results returned. Default: 50. Max: 500

offset	Optional	Posts returned will be offset by this number of results
--------	----------	---

Posts can also be filtered by form attributes by using the attribute as a parameter. ie

```
GET /api/v2/posts/1/revisions?full_name=David
```

Example Request

```
GET https://ushv3.dev/api/v2/posts/1/revisions
```

Response

```
{
